2. Summarization

- The Thesis locates ethnic minority and its cultural value, identifies the contents, relationships, roles and the need to promote cultural value of Khmer in the Southwest area in the construction of new rural areas where the Khmer live. Point out the current situation with the positive, limited, causes and problems when applying Khmer cultural value of Khmer to build current new rural. Forecasting and proposing recommendations for the cultural value itself to the support of all levels and sectors from central to local levels so that the cultural value of Khmer in the new rurals can promote better in the future.

- Culture is superstructure, but each cultural element can become a rich material resource through the will and actions of each individual and community.

- The topic has left some aspects, the need for further studies, such as: How is the returning impacts in the construction of new rurals on Khmer cultural value; cultural features such as: cuisine, incineration at the death, traditional dress of the southwest Khmer people, and what is these contributions to the process of constructing new rural or not, there is no condition to do the research; How to develop the cultural value of other ethnic minorities such as Kinh, Hoa and Cham in new rural development? The thesis has not had the opportunity to compare.
